|-------------------|-------|----------------------|-------|-----------------------|-------|
| Boron (B) .....   | 0.25% | Iron (Fe) .....      | 2.0%  | Manganese (Mn) .....  | 0.50% |
| Cooper (Cu) ..... | 0.50% | Magnesium (Mg) ..... | 0.50% | Molybdenum (Mo) ..... | 0.25% |

Micro and Secondary Nutrients derived from: Copper Nitrate, Iron Nitrate, Magnesium Nitrate, Manganese Nitrate, Sodium Molybdate and Sodium Borate

**BIO-GREEN** is a concentrated blend of chelated micronutrients recommended for use on all ornamentals, turf, vegetables and flowers. There are at least 16 different nutrients needed for healthy plant growth, the lack of any one of which can cause stress and even plant death. Factors such as pH, high phosphorous and other chemical imbalances can affect availability and actually tie up nutrients. Regular applications with **BIO-GREEN** will meet the nutritional needs of the plant without forcing growth.

**BIO-GREEN** will enhance any N-P-K turf program by providing a complete feeding that supports both grass blades and root systems. The result is healthy plant growth without heavy Nitrogen applications. It's like a multi-vitamin for your turf and plants.

#### RECOMMENDATIONS FOR USE

**TURF** - As a general supplement, apply 3-4 oz. in one or more gallons of water per 1000 sq. ft. beginning in early spring and repeat 3-4 times yearly.

**SHRUBS, FLOWERS & VEGETABLE GARDENS** - Apply 3 oz. in one or more gallons of water per 100 sq ft. and repeat up to 3 times per season.

**TREES** - Apply 2 oz. per each inch of tree diameter in 5 gallons of water once per year or combine with **BIO-TREE & SHRUB FERTILIZER** @ 1 quart per 100 gallons of mix.

**19-POINT PRESCRIPTION SOIL ANALYSIS** - follow recommendations of the Laboratory results.

**MIXING DIRECTIONS:** Fill tank half-way with water. As tank continues to fill, slowly pour **BIO-GREEN** into tank and agitate sufficiently until mixed. NOTE: If mixing with other products, mix a test batch first to assure compatibility.
